

**Proclamation of the City of Horseshoe Bay
Declaring the week of October 5-11, 2025
as “Fire Prevention Week”**

- WHEREAS,** the City of Horseshoe Bay is committed to ensuring the safety and security of all those living in and visiting our city; and
- WHEREAS,** fire remains a serious public safety concern both locally and nationally, and the presence of lithium-ion batteries in many household devices introduces unique fire risks; and
- WHEREAS,** most of the electronics used in homes daily — including smartphones, tablets, laptops, power tools, e-bikes, e-scooters, golf carts, and toys — are powered by lithium-ion batteries, which if misused, damaged, or improperly charged, can overheat, start a fire, or explode; and
- WHEREAS,** the National Fire Protection Association® (NFPA®) reports an increase in battery-related fires, underscoring the need for public education on the safe use of lithium-ion batteries; and
- WHEREAS,** residents should follow three key calls to action: Buy only listed products, charge batteries safely, and recycle them responsibly to prevent battery-related fires; and
- WHEREAS,** lithium-ion batteries store a large amount of energy in a small space, and improper use such as overcharging, using off-brand chargers without safety certification, or exposing batteries to damage can result in fire or explosion; and
- WHEREAS,** the proper disposal and recycling of lithium-ion batteries help prevent environmental hazards and reduce fire risks in the home and community; and
- WHEREAS,** Horseshoe Bay’s first responders are dedicated to reducing the occurrence of fires through prevention, safety education, and community outreach; and
- WHEREAS,** Horseshoe Bay’s residents are responsive to public education measures and are able to take personal steps to increase their safety from fire, especially in their homes; and
- WHEREAS,** the 2025 Fire Prevention Week™ theme, “Charge into Fire Safety™: Lithium-Ion Batteries in Your Home,” serves to remind us of the importance of using, charging, and recycling lithium-ion batteries safely to reduce the risk of fires in homes and communities.
